## State and Territorial Fish and Wildlife Offices

The US Fish and Wildlife Service works in partnership with many organizations and individuals. Fish and wildlife conservation requires coordinated efforts by the states and the territories, as well as private landowners, tribes, and other countries besides the United States. The list below provides a starting point for finding the state and territory agencies that manage fish and wildlife resources.

Also, the Association of Fish and Wildlife Agencies maintains a list of [natural resources agencies](#) for states, provinces, and territories.
